Detailed product information

APEX-CJ774 handheld Milk Protein Analyzer Use

milk protein determination

Category of products: multifunctional food safety rapid analyzer(single parameter)

Product specifications: sets

For solid, liquid milk, milk powder and detection

APEX-CJ774 handheld Milk Protein Analyzer Description

This product uses the spectrophotometric method with chemical reagents, rapid quantitative detection in milk protein content,apply to the business sector, supermarkets, food manufacturers,farmers, supervision and monitoring departments at all levels.

APEX-CJ774 handheld Milk Protein Analyzer features

1, the MCU control, with measurement, set the record, save, query and other functions.

Screen Chinese display interface user-friendly, intuitive readings.

The new optical structure makes this product has excellent optical performance, high measurement accuracy, long-term stabilitycharacteristics of the instrument, is the most advanced, practicaland analytical instruments.

4 light-emitting diode light source, with energy saving,environmental protection, energy saving, long life, fast response and so on.

5, the color of the kit, samples and reagents with less, to preventsecondary pollution.

6, easy operation, detection speed.

7, small size, light weight, easy to carry.

8, complete attachment configuration, the use of beautiful,durable aluminum toolbox, to facilitate the quantitative determination of the laboratory or field samples.

APEX-CJ774 handheld Milk Protein Analyzer technical indicators

Transmittance accuracy: $\leq \pm 1.5\%$

Transmittance repeatability: $\leq 0.5\%$
