### Detailed product information

#### ☆Introduction:

APEX-LJ354 water bath shaker is also known as air thermostat shaker is a temperature-controlled heated water bath and oscillator combination of biological and chemical equipment, plants, biology, microbiology, genetic, viral, environmental, medical and other research education and production departments for precision cultivation preparation indispensable laboratory equipment.

#### ☆Features:

1.APEX-LJ354 water bath shaker

A: The temperature control precision digital display.

B: variable speed, running a smooth, easy operation and safety.

C: has a mechanical timer.

D: spring omnipotent trial bottle rack suitable for a variety of comparative test culture preparation of biological samples.

E: set up the Oxygenating Kong thermostat working chamber Oxygenating.

F: cavity made of stainless steel, good corrosion resistance.

#### ☆Main Specification

model	PEX-LJ354 convolution
speed range	start~300rpm
Temperature range	Room temperature ~ 50 °C (digital)
Temperature accuracy	±0.5°C
Oscillation Mode	convolution
heating power	300W
oscillation amplitude	20MM
timing range	0 ~ 120 min or often open
power supply	AC220V 50HZ
