

## Six-channel temperature logger

Model: **APEX-CJ620**

Standard: **DIN EN 80601-2-59-2010 IEC 8**

Introduce: APEX-CJ620 temperature logger belongs to temperature and humidity recorder ,also belongs to food lab equipment, itsFeatures

1.The temperature of the lar...

### Detailed product information

APEX-CJ620 temperature logger belongs to temperature and humidity recorder ,also belongs to food lab equipment, its Features

1. The temperature of the large-screen display and intuitive to understand;
2. Built-in rechargeable high-energy lithium batteries, no need to buy batteries;
3. Comes with buttons to switch instruments, alarm switch, the maximum and minimum values query;
4. USB communication interface, and convenient data download;
5. High-strength case, user-friendly design, easy installation;
6. Green software, no installation, suitable for any system;
7. The number of domestic channel portable temperature recorder;

APEX-CJ620 temperature logger belongs to temperature and humidity recorder ,also belongs to food lab equipment, its parameters

Sensor	NTC sensors quality external length in accordance with customer requirements
Measuring range	-40 to 100 °C
Measurement accuracy	± 0.5 °C
Storage capacity	automatically record of 5,000 set of data
The record interval	2 seconds to 24 hours of any adjustable
Resolution	0.1 °C
Battery:	built-in rechargeable high-energy lithium batteries, can use an external power supply charge
Startup mode	immediate start / timer start / manual start
Stop mode	full stop / FIFO / timer stop / stopped manually
Alarm mode	LCD tips and built-in alarm buzzer, optional sound and light alarm and SMS alarm
Power supply	one 3.6V high-energy lithium battery-powered or 12V external power supply
Means of communication	USB communication or RS232 communications or RS485 communication
Key Functions	with key to open: according to customer needs, manually start recording or stop recording
With alarm to open the key	based on customer needs, manually turn off the alarm or open alarm
With a view:	You can always view the maximum and minimum values of the recorded data, the average
LCD	clock: real-time clock, beating displays year, date, time
Alarm	over-limit alarm, LCD speaker to display the prompt
Battery Tip:	When the battery is low, the battery symbol to display the prompt, then please use the charger
Supporting software	Simplified Chinese, English can also choose software green software without having to instal
Host size:	140 * 120 * 35mm nice
Weight	150G
Color	White
Random gift accessories:	Line of communication data recorder supporting software, rechargeable power supply, certific manual, factory test report, etc.
