### Detailed product information

☆Impurities filter,food lab equipment Introduction:

APEX-LJ430 Impurities filter is used for milk and its products about the determination of impurities degrees, the use of simple durable use convenient and reliable. Filter NaiYe after for production continue to use, reduce cost; The machine low noise, filtering effect is good.

☆Impurities filter,food lab equipment Features:

- 1.APEX-LJ430 Impurities filter put an end to the annoying noise of the first generation product more durable. Round impurities board to further reduce the detection
- 2.Patented product, easy to use and reliable. Filtered milk for production to continue to reduce costs; low noise of the machine, filter effects.
- 3.The apparatus in accordance with the Determination of impurities in the national standards GB/T5313.1-5413.32 "milk, dairy products, test methods and specialized manufacturing.
- 4.This instrument is a new generation product of the K-type impurity filter, ZA-GB1 type, improved integration of the pump, do not use belts, maintenance-free.

☆Impurities filter,food lab equipment Main specification

Power supply	220V/50Hz
Output power	50W
Flow	2.5L/nt
Weight	5Kg
Dimensions	300 x 200 x 100mm
