Detailed product information

APEX-JCX559 Binocular Stereo Microscope

First, microscope, stereo microscope introduction

Binocular microscoper is commonly used [food lab equipment](#). Continuous zoom stereo microscope provides high quality, durable and reliable optical system and operating mechanism. It can be widely used in health care, agriculture, forestry, geology, electronics and precision machinery industries and sectors, particularly suitable for LED, PCB inspection, pressing plating inspection, electronics inspection.

Second, the microscope, stereo microscope characteristics

Binocular microscoper is commonly used [food lab equipment](#).

The models long working distance, large clear scope, accessories complete and convenient operation.

Third, microscope, stereo microscope main technical specifications:

Binocular microscoper is commonly used [food lab equipment](#).

Observation angle of 45 ° head

Zoom ratio 1: 6.4

Eyepiece WF10X/20

Objective 0. 7x-4.5x

7x-45x magnification

IPD adjustment range 55-75mm

Working distance 100mm

Column height 240mm

Diameter ϕ 32mm

Base size 200x255x22mm
